Unbeatable Power

### Advanced Hybrid Tech.

## Controlled Tension

Sleek and flowing lines extend upward from the front to the back. Characterized by flowing surfaces. The sharp body lines are wrapped with dazzling orange & red steel frames. They are elegant and but aggressive. The combination and continuity creates what we call controlled tension.

### Apex Predator Face

With a piercing stare, pointed ears, a curled lip, and glaring teeth, Villain's presence is intimidating. With strong facial features complemented by meticulous attention to detail, we are focused and intentional, while exuding aggression. Making us the apex predator.

### The Pounce Stance

The pounce is represented through the pointed shoulders, dipped nose and arched back. This is most prominent from the side profile.

### Exposed Engineering

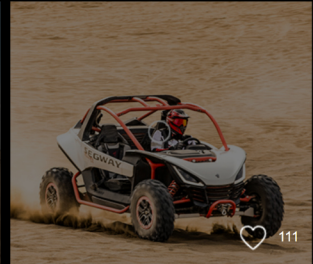

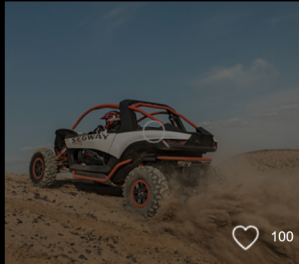

We show our muscles with pride, we confidently reveal their intrinsic weaving throughout the body. We are built for all-terrain and whatever punches are thrown our way you won't see us flinch. We see beauty in our engineering and want it known that we are built to last.

### Simple Controlled Tension

We know our vehicles can pack a punch and we not only expose our engineering but we celebrate it through color and simple yet beautiful interior parts.
